DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on April 5, 2007 has been entered.

Response to Arguments

2. Applicant's explanation of the instant invention in pointing the difference with the cited prior art was found to be persuasive.

EXAMINER'S AMENDMENT

3. In view of allowable subject matter, the Applicant's representative was contacted to place the claim in allowable form.

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven M. Mills on June 21, 2007.

The application has been amended as follows:

In claim 37, line 13, following the word "electrode", - - is formed of a single conductive layer including a first portion formed over the via - level intermetal dielectric and a second portion which - - was inserted.

Allowable Subject Matter

5. Claims 16 - 29, 31 and 33 - 37 are now allowed:
6. The following is an examiner's statement of reasons for allowance:

Claims 16 - 29, 31 and 33 recite, inter alia, metal - insulator - metal capacitor, the structure comprising a line trench extending substantially completely through the trench - level intermetal dielectric to contact the via - level intermetal dielectric, a via extending through the via - level intermetal dielectric without extending through the trench - level intermetal dielectric and a metal - insulator - metal capacitor formed between the via - level intermetal dielectric and the trench - level intermetal dielectric to include a lower electrode, a dielectric layer, and an upper electrode. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claims 34 - 36 recite, inter alia, a dual damascene interconnection structure with a metal - insulator - metal capacitor, the structure comprising a via - level intermetal dielectric and a trench - level intermetal dielectric and a metal - insulator - metal capacitor formed between the via - level intermetal dielectric and the trench - level intermetal dielectric and an alignment key formed only in the via - level intermetal dielectric so as to have the step difference to align the metal - insulator - metal

capacitor. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Claim 37 recites, inter alia, a dual damascene interconnection structure with a metal – insulator – metal capacitor, the structure comprising a via – level intermetal dielectric and a trench – level intermetal dielectric and a metal – insulator – metal capacitor formed between the via – level intermetal dielectric and the trench – level intermetal dielectric to include a lower electrode, a dielectric layer, and an upper electrode wherein the lower electrode is formed of a single conductive layer including a first portion formed on the via – level intermetal dielectric and a second portion that extends through the via – level intermetal dielectric and is directly connected to the first lower metal interconnection. The art of record does not disclose or anticipate the above limitation in combination with other claim elements nor would it be obvious to modify the art of record so as to form a device including the above limitation.

Conclusion

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
